About

AI/ML Engineer with experience in Python, FastAPI, LangGraph, OpenAI APIs, Docker, PostgreSQL, Redis, and React. Experienced in developing AI agents, machine learning applications, RESTful APIs, and scalable backend systems. Strong foundation in software development, model deployment, and cloud-ready architectures with a passion for solving real-world problems through AI.

Experience

AI/ML Intern- KEMURI Technology

Dec 2025 - Present

- Backend Developer specializing in AI-powered microservices and production-grade Python applications using FastAPI, Docker, OpenAI APIs, and RESTful architectures. Experienced in feature development, security hardening, performance optimization, and test-driven development.
- Skilled in Python, FastAPI, Docker, OCR, Pydantic, Structlog, and frontend development, with a strong focus on building scalable, maintainable, and well-tested software solutions.

AI/ ML Intern - Evoastra Ventures Pvt Ltd

OCT 2025 - NOV 2025

- Working on real-world AI and Machine Learning projects focusing on data-driven solutions and predictive analytics under the guidance of experienced mentors at Evoastra Ventures.
- Responsibilities include model development, data preprocessing, and performance optimization for ongoing client projects.

Projects

MAP — Multi-Agent AI Automation Platform

- Architected and led development of a production-grade multi-agent orchestration platform using FastAPI, LangGraph, PostgreSQL, Redis, Celery, React 18, and TypeScript.
- Implemented circuit breakers, structured logging (structlog), and distributed task execution across the agent pipeline.

SRS — Automated Customer Support Resolution System

- Built an enterprise ticket classification system achieving 90%+ routing accuracy — FastAPI, PostgreSQL, Redis, multi-tenant architecture.
- Implemented OpenAI→BentoML fallback chain, Redis caching, and rate limiting with slowapi

Shawty — Local-First Autonomous Coding Agent

- Built a Claude Code-style autonomous coding agent using LangGraph and Ollama, with zero cloud dependency.

Deepfake Detection API

- Built an EfficientNet-B4 deepfake classifier achieving 94%+ accuracy, with GradCAM explainability and Docker deployment.
- React/TypeScript frontend for real-time inference visualization.

Technical Skills

- Programming Languages: Python, C, C++, DSA
- Backend: FastAPI, Celery, Docker, Pydantic, Structlog
- Databases: PostgreSQL, Redis, MySQL
- Tools & Concepts: Machine Learning, Data Analysis, Git
- AI/Agents: LangGraph, LangChain, RAG, OpenAI API
- Frontend: React 18, TypeScript, HTML, CSS
- Libraries: NumPy, Pandas, Matplotlib

Education

- B.E in Artificial intelligence and Data Science (Final year) 2023-2027
SRCOE, Pune
- Intermediate - Maharashtra board - 60.33% 2021-2023
SBES college of science, Chh. Sambhajnagar
- SSC - Maharashtra board - 84.40% 2020-2021
Godavari public school, Chh. Sambhajnagar

Languages

- English
- Hindi
- Marathi
- Japanese(Speaking)
